RE: NYSERDA Environmental and Fisheries Research for Offshore Wind Energy Development Program  
Opportunity Notice

Dear Selection Committee:

Please accept this letter from the Mid-Atlantic Fishery Management Council (Council) in support of Biodiversity Research Institute (BRI) and the Long Island Commercial Fishing Association in their proposal to the opportunity notice, entitled "Working With Commercial Fishermen and Other Marine Professionals to Determine Offshore Occurrence Patterns of Bats and Landbirds."

While the Council is not involved in the management of bats or landbirds, we are following offshore wind energy development issues closely and believe this project would be an important contribution to the body of knowledge on potential wildlife impacts from these projects. The commercial fishermen in our region are highly attuned to ocean conditions and wildlife, and could provide valuable insight into wildlife presence in these offshore areas. The Long Island Commercial Fishing Association has long been a highly engaged stakeholder group in our Council's process and would provide important on-the-water knowledge and valuable relationships with commercial fishermen to engage them in this proposed citizen science effort.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "C. Moore".

Christopher M. Moore, Ph.D.  
Executive Director
