

Joint Mid- and South Atlantic Blueline Tilefish Subcommittee TORs

1. Develop a process for coordinating ABC recommendations from both SSCs for the portion of the blueline tilefish stock north of Cape Hatteras.
2. Decide on which data sets are most appropriate to use to develop ABCs for both areas. This includes both catch and biological data, specific to each area if possible.
3. Decide on the appropriate methodology or methodologies for developing ABCs based on the available data for each spatial region.
4. Propose ABC recommendations for the two SSCs.
