Management Track Assessments

Management track assessments provide routine, scheduled, and updated advice to directly inform management actions. These assessments are designed to be:

- Simple, quick, efficient, and flexible: and
- Able to incorporate new information on a regular cycle.

Management track assessments ensure that stock status is updated on a regular and predictable basis.

Research Track Assessments

Research track assessments are complex scientific efforts that are designed to be carried out over several years. They can:

- Focus on research topics or on one or more individual stocks:
- Evaluate an issue or new model that could apply to many stocks: and/or
- Consider extensive changes in data, model, or stock structure.

Research assessments can provide the basis for future management assessments.
