Re: Deep Sea Corals Amendment Comments

Dear Dr. Moore,

We are submitting 5,837 comment letters from Natural Resources Defense Council members and activists in response to the Mid-Atlantic Fishery Management Council's Deep Sea Corals Amendment.

Of the 5,837 comments, 5,653 commenters made no edits to the form letter below. An Excel sheet with all form letter responders' contact information is also attached as DeepSeaCoralsAmendmentComment_unedited.xls. In addition, please find DeepSeaCoralsAmendmentComments_unique.pdf which contains 184 unique comments collected by NRDC.

Please contact me at 212.727.4551 or achase@nrdc.org with any questions regarding this comment submission.

Sincerely,

Alison Chase

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.
- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.
- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,

Dr. Jessica Adams

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

There won't be any more fish if we destroy corals, so it's in the fishing industry's best interests as well to support aggressive conservation measures,

Sincerely,
Dr. Jessica Adams

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support. Every once in a while, if we are lucky enough, we will be faced with a choice in which we can choose to stand up for something smaller and more vulnerable than ourselves, something in which its very existence depends on our decision. You have that choice before you today. The corals will die with the current fishing practices and environmental devastation. Please have the courage to protect something greater than ourselves.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.
- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

As an advocate for creation cycles, I choose my petitions carefully. Politics are of no use to me; sustainable health is. Issues surrounding ocean and essential ocean life such as sea coral are extremely important. Industry and government can no longer afford to be arrogant. Our relationship with nature must be one based on cooperation - instead of what was once a successful dominance - thanks to our wisdom, reason, self-preservation, love of beauty, knowledge of science, and commitment to human culture. These are some first steps to take regarding coral.

* Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

* Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

Consider for a moment how you will be remembered by whatever humans remain on this planet.

I urge you then to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Dr. Stephen Putman

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Well protected ocean life provides life to us on land. Seafood harvesting must save this vital resource for the well being of all, including we who favor seafood for health. Please do what it takes to harvest healthful seafood, without damaging the ocean ecology, even if it makes the cost of the food products greater. We all need to contribute to the healthfulness of our planet.

Sincerely,
Ms. Sharon Fiitzgerald

Dear Dr. Christopher M. Moore,

Feeding the world's population today is a monumental task that increasingly requires using greater care that our efforts are sustainable and ecologically sensitive. I very much appreciate having this opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

It is my hope you will adopt the strongest conservation measures possible, including the following:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.
- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.
- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Thank you for considering measures that will protect this unique deep-sea habitat.

Sincerely,
Ms. Caroline Ellis

Dear Dr. Christopher M. Moore,

I am on the National Resource Defense Council (NRDC) support members mailing list. The NRDC routinely sends me requests to write to various agencies regarding the interests of its members. As a matter of general practice I do not forward the requests unless I am sufficiently well informed on the topic to make sure the request is a reasonable one considering all of the relevant factors. I believe that this request fulfills that criteria.

It appears that your organization has already begun to take a balanced and rational approach to protecting deep water corals. I ask simply that you continue to do so and do not be overly swayed by the loudest or most well heeled special interests.

Sincerely,
Mr. Dan Tomlinson

We enjoyed snorkeling in St. John's for many years but know the reefs are being destroyed and there are less fish than 10 years ago. Such a short time to see the change.

My family sees the change in ocean and salt water fishing with over fishing from commercial fishermen and their large nets. Please help us save our water for our grandchildren.

We need strict regulations and harsh fines. Help us now!

Sincerely,
Mrs. Kathryn Stewart

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

After growing up in Florida and having wonderful memories of diving over the coral reefs there, I would be terribly disturbed at the idea of losing much more of the reefs than we've already lost. Areas off of the Keys and other areas even further South of the United States reef areas, that have been allowed to remain in pristine conditions are becoming less and less as we continue to move into their habitat. Please take precautions that will help protect these coral reefs so they will be around for my grand kids or great grand children to be able to swim over and see them. But not just for them to see them, the coral reefs do much more for the ocean and its habitat than bring in tourists. In areas where the reefs have died out, the ocean and other fishes or ocean and marine life are adversely affected overall.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Ms. Linda Robinson

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time. We only have one earth. Let us take care.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Ms. Denise Atkinson

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

This coral life has intrinsic value. I have two young children. We do not eat every life we see, in fact we are vegans and we would like for there to be someone left in the ocean besides floating boats and garbage while the fishing industry takes the catch, the money, and runs leaving nothing for the rest of earth's inhabitants.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Dear Dr. Christopher M. Moore,

Please help protect the ocean.

If the ocean does not work as a system, the entire ecology could begin collapsing.

Don't you love to snorkel and see those beautiful corals? Don't you want your children, grandchildren, nieces and nephews to enjoy this beautiful underwater world. It has taken thousands and thousands of years to develop. Please don't let such short term actions destroy an ancient established yet delicate world.

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

* Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

It is no secret that our oceans, which cover the majority of our blue planet, are under numerous threats. Overfishing and destructive fishing practices are having a measurable and unsustainable impact to our ocean life. Even if I did enjoy scallops I would not purchase them because the scallop harvest method is so destructive to the sea floor. Other drag net fishing techniques have a similar impact.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Without the proposed protections the fisheries as we know them will disappear within the next generations.

Thank you for the opportunity to comment on this important issue.

Sincerely,
Mr. Glenn Taylor

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

The ocean is a huge ecosystem, full of marine life. I have deep concerns regarding it's vitality. Please adopt the strongest conservation measures possible to protect deep-sea corals, which in turn protects other sea life, which ultimately impacts humans as well.

Thank you.

Sincerely,
Ms. Ruth Richmond

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Coral reefs are the basis of ocean and sealife health, and the ocean's health is the basis of our health.

Sincerely,
Dr. Carol Lassen

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

We need to stop raping the ocean for food , people can be educated to eat non animal food. When you destroy the corals to find the fish and crabs you are killing two species. It is the worst kind of destruction.

I have been studying corals for over twenty years and these amazing animals need to be protected, there is so much we do not know about them and the chemicals they contain, we can not afford to destroy them. Corals are extremely sensitive and can not tolerate anything scraping or hitting their tissue. May

I urge you to adopt the strongest conservation measures possible and:

* Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

Dear Dr. Christopher M. Moore,

I grew up in the South Pacific and some of my most treasured childhood was learning to swim and to snorkel in reefs. I learned to appreciate the beauty but also respect the fragility of our underwater world. Sadly, within my lifetime I've also seen heartbreaking destruction of our environment. The reefs I once enjoyed have been damaged, bleached out, and even destroyed by indirect and direct human impact. It is my sorrow that my child's generation cannot experience them the way I did. My fear is that her children's generation will never know.

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

I have recently been reading about the environmental changes happening in oceans around the world, among them are increasing temperatures and acidity creating "dead zones" and destroying coral reefs and the marine life that depend upon them. Scientists are unsure of the impacts these changes may eventually have upon humans and other species, but the long term prognosis is not good. In fact, it's downright alarming!

I urge you to adopt the strongest conservation measures possible to protect our oceans, corals and the marine life they support by:

- * Prohibiting all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopting a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Requiring the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Mrs. Christine Blanchfield

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy. The sustainability of our fishing and ecosystems depends on these links and degradation of them will only bring negative impacts to all of our futures.

Sincerely,
Mr. Daniel Mc Sween

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

I urge you to adopt the best conservation measures possible to protect and preserve the destruction of coral ecosystems from commercial fishing practices. Several important measures to consider are described below.

1. Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by your Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.
2. Establish a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. No gear exemptions should be extended and Council efforts should seek to limit and reduce harmful impacts from such bottom-contacting fishing gear immediately.
3. Require the use of electronic vessel monitoring systems aboard commercial fishing vessels to ensure the plan is effectively implemented on the water.

Together, these measures will serve to protect deep-sea coral ecosystems for marine life and for future generations to discover and enjoy.

Sincerely,
Mr. Stuart Berger

Dear Dr. Christopher M. Moore,

Hello, Council Members.

I can't possibly overstate the importance of all the ecosystems on this world are to each one of us and, if they continue to be disrupted, how catastrophic will be the consequences for all of us but, especially, for the marine environments and those, human and non-human, who depend on them for their livelihoods.

It's impossible to say when the brunt of the disaster will hit but I can guarantee you, if the fisheries don't act to minimize the damage they do as soon as possible, they will the destruction of marine habitats will have, for them, the fisheries, the greatest and longest lasting impact.

Never forget it was the living beings on this world that made the world livable for humanity, it's the living beings on this world who keep the world inhabitable and, without them, the world will slip back into the miasma of reducing gases from which life first arose.

It would behoove the fishing industries of the world to demand the establishment and monitoring of no fishing zones around all the continents and islands of this world for all our sakes.

Thank you.

Sincerely,
Mr. Ross Boglin

In the 1970s I was considering a career in oceanography. I subscribed to Sea Secrets and Sea Frontiers. In the early 1980s, I visited the John Pennekamp Coral Reef State Park. That experience was terrific. To think the fishery industry is willing to destroy coral reefs with impunity is disgusting.

Surely the fishing industry can implement a thoughtful plan to protect coral reefs with little or no impact on their profit.

Sincerely,
Mr. Stanley Cobb

Dear Dr. Christopher M. Moore,

Thank you for taking this moment to listen. Some of the greatest life engines on our tiny planet are in extreme danger, in fact, we have lost a great many of them already that need to be re-engendered.

The following measures will help protect these unique deep-sea habitats and all the species of marine life they produce for planet's life sustaining marine ecosystem that future generations need for our survival.

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Our time is gone for sitting on the fence when it comes to our ecosystem's welfare. The future of many species, including our own, depends on quick and life positive decisions NOW!

People can't eat or breath corporate profits.

Thank you

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

As a child, I was exposed to the amazing underwater world through my fathers scuba diving business and his love of the ocean. It truly terrifies me to think that the otherworldly and amazingly beautiful coral communities that, as a child, took for granted 40 years ago, and all of the amazing lifeforms and communities that are sustained by the reefs, are nearly close to extinction. Or... they will be if nothing is done... NOW.

I urge you to adopt the strongest conservation measures possible and:

* Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

* Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

* Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

How much more damage to our oceans, due to economics, need to be done, before no amount of money can save the human race?

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy. And the lives you save, may just be your own.

Sincerely,
Ms. Su Mongillo

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and: protect this unique environment. The coral colonies are replaceable and we have abused the oceans of this world too much already. It truly affects the future of many fish habitats. Please make the choice on the side of the coral colonies. Thank you for your consideration.

* Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

* Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

* Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Mrs. Mellisa Elrick

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

I took a class called "Reefs Throughout Time" last year and learned more than I'd ever expected about reefs' contribution to the nearby ocean and to our knowledge of Earth's past, and corals are the dominant reef-building organisms in modern oceans. They are amazing in their own right and serve as good indicators for oceanic health, which means that many corals are already struggling to survive; getting sideswiped by fishing equipment wouldn't help them at all, or any of us. Please do everything you can to protect corals from unnecessary destruction by fishing equipment!

Sincerely,
Ms. Kathryn Dorn

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Do you have a conscience? It's hard to find one in government but you are charged with managing our fisheries--an almost god-like responsibility. By letting reckless, self-interested, moneyed fishing businesses have their way, you're damning it to ruin.

Big fishers use nasty, abusive nets (and other evil practices) that hit the coral and deform it to the point it's no longer producing food at the primary producer level. which in turn kills the secondary producer organisms which in turn will kill the fisheries.

Please acknowledge and abide your conscience and persuade your cohorts to do the same. We only get one life, use yours for something meaningful.

Good luck.

Laura Dennis

Sincerely,
Ms. Laura Dennis

Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

* Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy. Just as the fishing industry is an important part of our lives, so is its eco-management.

Sincerely,
Mr. Joe Versical

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

* Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

* Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

* Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy. WE SHOULD PROTECT WHAT REMAINS --- IT TAKES MUCH TOO LONG TO REPLACE.

SINCERELY,
BLAIR
MOSELEY

Sincerely,
Mr. Blair Moseley

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

Off the Atlantic coast, undersea canyons with vibrant deep-sea corals provide food and shelter for squid, lobsters, and endangered fin and sperm whales.

But as a global appetite for seafood grows, weighted fishing nets threaten to destroy the fragile, living seafloor that has taken hundreds--or even thousands--of years to establish.

The regional fishery council is poised to vote on a historic plan to protect our Mid-Atlantic coral communities from fishing gear damage. We are taking action and helping to protect these vulnerable deep-sea coral communities!

We urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Ms. DIANE KASTEL

Dear Dr. Christopher M. Moore,

We hope you will protect the corals. Such amazing places, we see films and are swept away by their beauty, beauty which humans can destroy forever.

Please follow the recommendations by the NRDC.
Fishing nets kill so many marine animals, now I learn of fishing gear that scrubs the ocean floor! How can we create such harmful products? They must be outlawed.

Please protect a large area and make sure the new protections can and will be monitored. What the conservation groups are recommending are sound, thoughtful and show our responsibility as stewards of this beautiful Planet Earth.

Sincerely,

I work as a Sciences teacher (middle and high school) in rural central Virginia. I am very concerned about protecting our environment. I write today about protecting corals.

I urge you to please adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

I do thank you, and with warm regard remain

Sincerely,
Mrs. JL Horn

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to PROTECT our ecologically valuable and VULNERABLE deep-sea corals and the precious marine life they support.

It is URGENT that you adopt the STRONGEST conservation MEASURES POSSIBLE and:

* PROHIBIT ALL fishing gear that HITS OR SCRAPES the seafloor from ALL of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration CORAL HABITAT MODEL.

* ADOPT a BROAD coral PROTECTION ZONE with the landward boundary at the 200 meter depth contour, in order to PROTECT corals that fall outside the canyon areas from bottom-contacting fishing gear. ANY gear exemptions MUST NOT extend beyond those currently proposed as alternatives in the public hearing document---for red crab and tilefish---and MUST seek to LIMIT AND REDUCE harmful IMPACTS from such gear OVER TIME.

* REQUIRE the use of ELECTRONIC vessel MONITORING SYSTEMS aboard fishing vessels to help ensure the plan is EFFECTIVELY IMPLEMENTED on the water.

Together, THESE MEASURES WILL PROTECT this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Please DO IMPLEMENT THEM !!

Sincerely,

We need more help for preservation, conservation in the SE TN, N GA areas in and around these historic, and environmentally sensitive areas, forests, and landscapes with endangered/migratory/threatened species, of Apison, E. Brainerd, E. Hamilton, Collegedale, Summit, Collegedale, Harrison Bay State park areas and into Ooltewah, White Oak and other mtns/ridges/hills in area, and into Lebanon, Black Fox, blue springs, Flint Springs, Oak Grove, and Red Clay State park areas and areas around these such as Cohutta, Cherokee valley Ga, and areas around these, which have a long known large cave underground which is a river drainage basin, and subject to sudden, widespread contamination and pollution throughout the SE USA, in states such as Ala, GA, Fla, and in rivers such as Coosa, Conasauga, etc, in which there are areas in which small natural "fish hatcheries" develop, thus making it needed habitat for a variety of aquatic wildlife, and good for ecotourism, the environment, and the economy, as well as maintaining these areas, and waterways as drinkingwater resources, for people and

wildlife, etc. These areas listed above need no more forced or other ex/sub/urbanization or rezoning of lands, of any kind away from being as quiet, rural and as backwoods as possible. These areas are still prone to sinkhole formation and if an earthquake should occur in these areas, liquefaction may swallow up, real estate, and other personal property, and may precipitate contamination of the waters flowing through underground river drainage basin, which the natural ancient geology has long supported. These areas were determined in the 70s to need to always remain as sparsely populated rural areas, so as to maintain and preserve its natural, cultural, and economic resources, both above and below ground. These areas do not need more real estate developments (or expansions), or roads, or larger roads, highways, interstates, of any kind now or in the future in and/or around these areas. There do not need to be more permits for real estate developing, or contractors, etc, or for transportation related developments of any kind for these areas at all! We need more permanent and/or strict adherence to guidelines, rules, regulations and environmental, consumer, and public health and safety laws, etc, to prevent the wrong kinds of areas, landscapes, etc, from being built upon and prevent these lands generally speaking from being used for the wrong land uses.

Please help in all areas possible, we also need the mega substation and/or other unclean energy developments, lines, underground tanks, etc, removed as the areas they were on, rewilded and preserved by a non-TVA type of organization, or group, that will truly work to help the environment and clean green energy, that would be best for this kind of area. We need more solar energy and if there is a need for wind, it does not need to mess up the scenic areas, and should possibly be put downtown, on top of buildings, etc., just as a suggestion. We do not need metro/municipal annexation, etc, and need the whole metro/municipal charter(s) which are consuming more natural lands, wetlands, waterways, and thousand of acres previously used as farmlands, and/or natural areas etc, to be left 'as is' to protect and maintain the environment and prevent pollution of water/soil/air quality, as well as possible.

Thank you.

Sincerely,
Ms. Kimberly Rowlett

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.

- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations -- including my granddaughters -- to discover and enjoy as I did.

Sincerely,
Ms. Kathryn Little

Subject: Deep Sea Corals Amendment Comments

Dear Dr. Christopher M. Moore,

Thank you for the opportunity to help shape your historic effort to protect our ecologically valuable and vulnerable deep-sea corals and the marine life they support.

WE NEED OUR MARINE ENVIRONMENT TO BE HEALTHY AND PRODUCTIVE AND CORAL PROTECTION IS THE KEY COMPONENT REQUIRED FOR MAINTAINING A SUSTAINABLE PRODUCTIVE ECO SYSTEM. PLEASE PROTECT CORAL REEFS. THEY BELONG TO THE WHOLE WORLD, NOT JUST TO A SPECIAL INTEREST HARVESTING SHORT-TERM PROFITS AT THE EXPENSE OF THE LONG-TERM INTERESTS OF ALL PEOPLE AND MARINE ORGANISMS THAT DEPEND ON A HEALTHY CORAL ENVIRONMENT.

I urge you to adopt the strongest conservation measures possible and:

- * Prohibit all fishing gear that hits or scrapes the seafloor from all of the canyon areas that have been identified by Council staff as discrete protection zones based on the National Oceanic and Atmospheric Administration coral habitat model.
- * Adopt a broad coral protection zone with the landward boundary at the 200 meter depth contour to protect corals that fall outside the canyon areas from bottom-contacting fishing gear. Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.
- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Sincerely,
Dr. Hilary Lorraine

Any gear exemptions should not extend beyond those currently proposed as alternatives in the public hearing document--for red crab and tilefish--and should seek to limit and reduce harmful impacts from such gear over time.

- * Require the use of electronic vessel monitoring systems aboard fishing vessels to help ensure the plan is effectively implemented on the water.

Together, these measures will protect this unique deep-sea habitat for marine life and for future generations to discover and enjoy.

Just as Vermont has the oldest coral fossils your state can have one of the most protected coral reefs living. Also in time this will allow more species of marine life to forge giving your fishing industry time to plan ahead for the future.

Sincerely,
Mrs. Ann Kalinoski
